Contrary to popular belief, the United States Census Bureau does not fold its tents and silently fade away between the big 10-year population and housing count. John G. Gibbson is the director of the bureau's permanent regional field office at Philadelphia which embraces Delaware, Maryland, Pennsylvania and part of New York.

Gibson points out that nine major censuses will be conducted between now and the next decennial census in 1970. The first of these will be the 1962 Census of Governments which is conducted every five years. Then comes the fiveyear Censuses of Business. Manufactures and Mineral Industries. These will be taken in 1964 and 1969, covering business operations in 1963 and 1968 respectively. The Census of Agriculture will be conducted in 1964 and 1969.

In addition to these major censuses, the bureau carries out a wide variety of current surveys on a monthly, quarterly, and annual basis. Topics covered in the current surveys include employment and unemployment, population characteristics, health, housing, retail and wholesale trade, manufacturing, and related subjects. The purpose of the current surveys is to supplement and keep up to date the detailed information collected in the major censuses.

The Current Population Survey, conducted 12 times a year, is probably the best known Census Bureau interim activity since it provides monthly information on employment and unemployment. Information obtained by interviews in 333 sample areas of the country is combined to furnish statistics for national estimates. Information on migration, income, school enrollment, and other pertinent subjects is collected from time to time in the Current Population Survey in addition to the facts on employment and unemploy-

Approximately 35,000 households throughout the country are included each month in the Current Population Survey. These households are selected at random under the Census Bureau's scientific sampling program to provide a representative cross-section of all classes of the population, and all types of areas of the country-large cities, small towns, rural areas, and so forth.
